

SELF EXPLORATION

Haikal Zafri

CONTENTS

1. Things I like to do in Korea
2. Study Plan
3. After graduation plan

PASSION

The main reason I went to Korea is to expand my horizon and meet new opponents from other country. This way, I could get new experience and improve my ability in the field.

EXPLORE

When you go to a place with a totally new environment, you must want to explore the place to get new experiences and get familiarized with it.

LANGUAGE

Since Korean language does not use alphabets, it is a bit challenging for me to be fluent and use it in a daily communication with the locals.

CHARACTER

Korea has a totally different environment compared to my country. Without a doubt, there will be some challenging times and hardships, but they are necessary to build a new character in me.

THINGS TO DO IN KOREA

STUDY PLAN

SURVIVE

Like all other students, my plan for these 4 years is to survive and graduate with flying colors.

IMPROVE KOREAN

I will put more efforts into studying Korean because I need to get level 4 in TOPIK to graduate.

SELF-EXPLORATION

Instead of relying only in classes to learn regarding my field, I am planning to explore deeper in my majors using Internet and other methods.

LEARN

I am planning to learn more computer languages to acquire a more flexible skills in my major.

AFTER GRADUATION

INTERNSHIP

- Look for internship

CAREER

- Look for an employment opportunity regardless of country depending on the situation.

EDUCATION

- If its possible, I do not want to further my studies to Master or PHD but depending on the situation in terms of financial and time, I might do it.

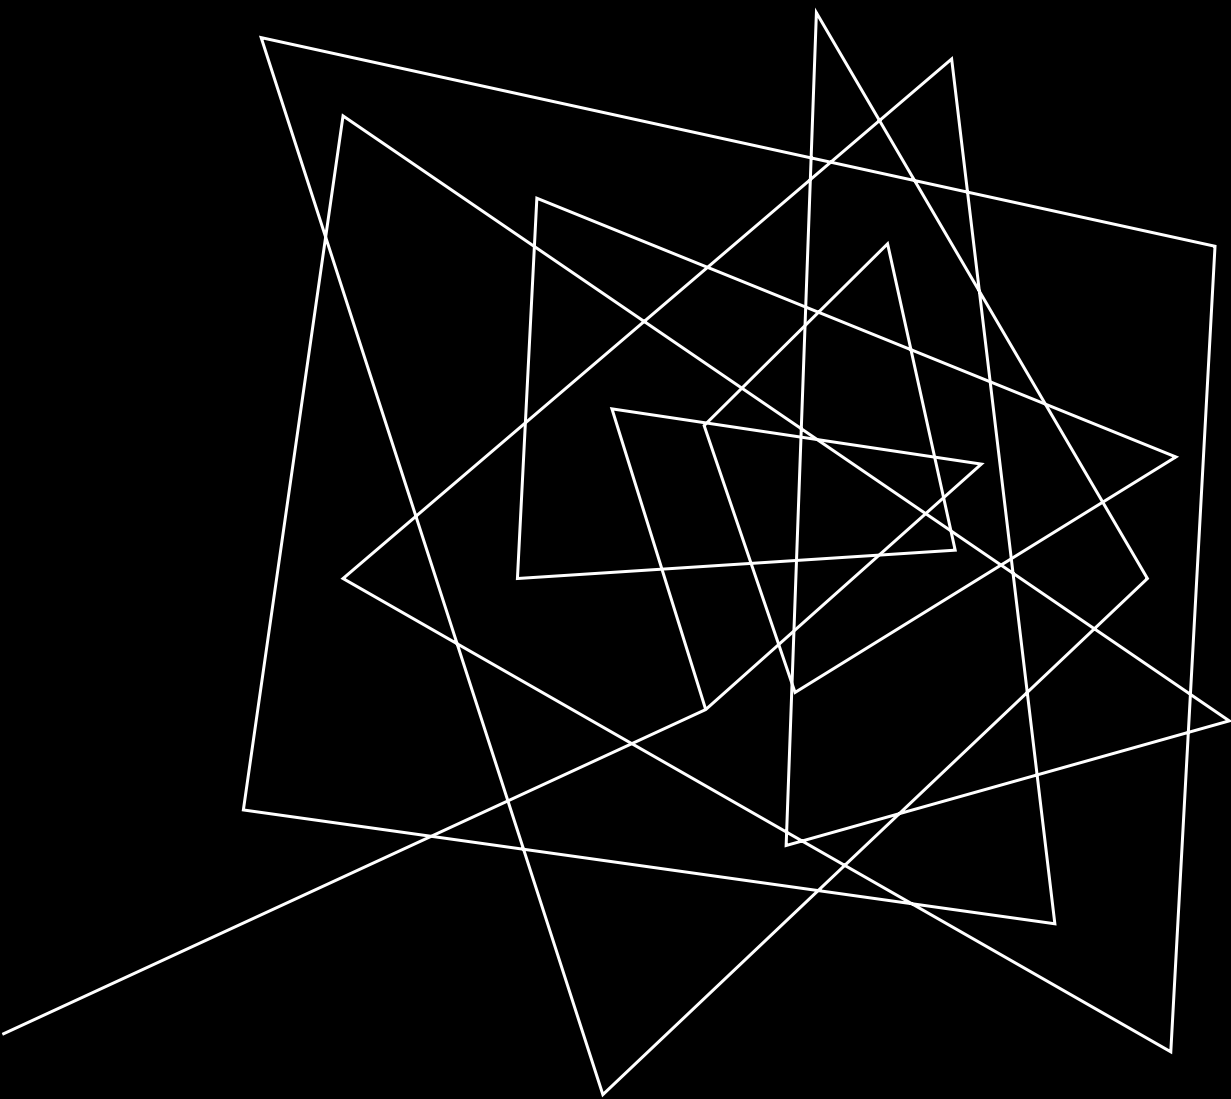

HOME SWEET HOME

- There is no home like the one you have got because that home belongs to you.
- “Hujan emas di negeri orang, hujan batu di negeri sendiri, lebih baik di negeri sendiri»
- No matter how benefits or advantages other country have, it still better to be at your own country.

SUMMARY

I think it is safe to say that we all have our own plans in our life especially after we finished our studies. Some might plan to further their studies into a higher level of education while some might want to find a suitable career right after graduation. Although, there could be a minority that wanted to continue pursuing their passion and dream in other field such as sports. I wish you all a good luck in your journey of pursuing amazing things and I hope you can be proud of yourself when you achieve those things.

THANK YOU
감사합니다
